

# CabCheckS

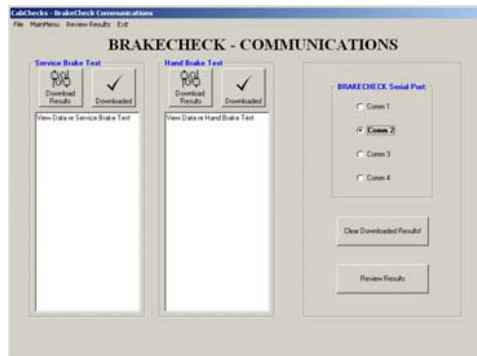

## Quick Reference Guide

This guide is to download, save and print your brake tests

1. Double click on the CabCheckS icon all load from your program menu.

2. On the CabCheckS intro screen click on **BrakeCheck Comms**

3. Connect your BrakeCheck to the PC cable; make sure the correct comm port is dotted.

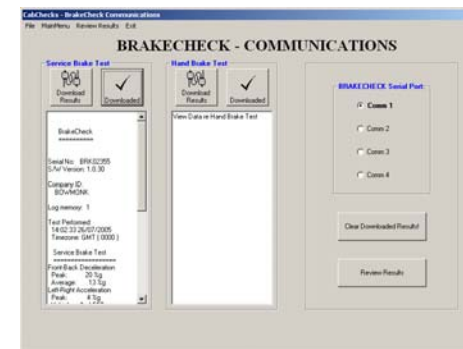

4. To review the results or download to CabCheckS bring up Sbr on the BrakeCheck display, press MENU twice, you should now have two lights indicating Service Brake and Last Test Result, press ENTER, with the BrakeCheck *Plus* the display will show LA press MENU the display will now show the last test reviewed L# or L1 (if you have a 1 test memory BrakeCheck just press Enter), press MENU to increase the test number, if you hold down the MENU button the test numbers will increment rapidly. Once you have decided which test you would like to review or print press ENTER.

5. Within CabCheckS over the corresponding test that you wish to download click on the **Download Results** button (this will go yellow).

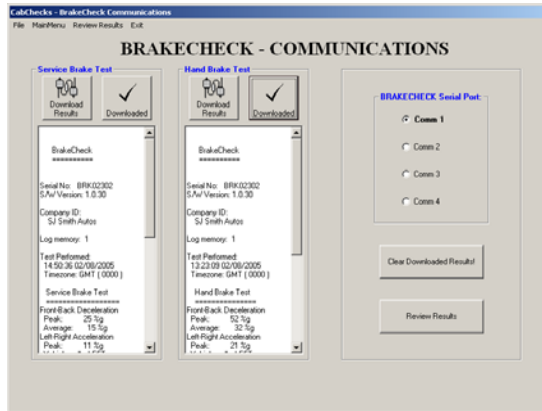

6. On the BrakeCheck press **PRINT** and wait until the PRT on the display has vanished. Go to step 7!

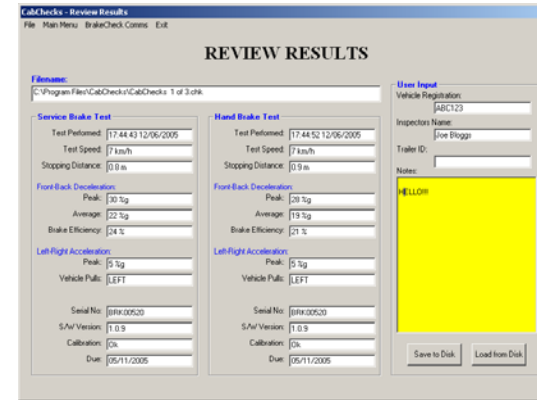

7. Click on the **Downloaded** button on the CabCheckS brake test.

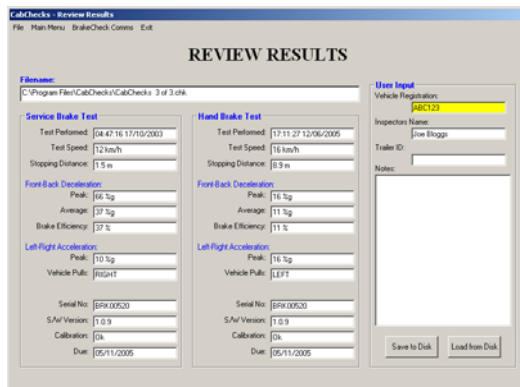

- You should now see the brake test results in the corresponding window.
- Do the same (if required) to download the hand brake.

- Type in the Vehicle Reg / ID, this box will be yellow; you then must type in the inspector and any optional notes you wish to add.

- Click on **Review Results**.

- To save the test to your hard drive, Click on File in the top left hand corner then **Save Data**, choose a directory and file name and click **Save**.
- Click on File in the top left hand corner, then **Print** to print the brake test.
- To close the program click on exit in the top left hand corner.
